MORE THAN A BOX

> ULTIMATE EQUIPMENT PROTECTION FROM THE ELEMENTS

STRONGER BY DESIGN

The Pelican Protector™ Case use an open cell core and solid wall construction, which is actually stronger and lighter than a solid core wall. Travel light with heavy protection. And you know it's a Pelican™ Case by the distinctive dual band top surface.

New Stronger Double-Throw Latch

Stainless steel pins are used for hinges and handles. The new Double-Throw latches are smarter and easier to open: it's the classic 'C' clamp design with a secondary movement that works like a pry bar to start the release and offers plenty of leverage to open with a light pull.

WATERTIGHT

The secret is the tongue-and-groove fit with Polymer sponge o-ring acting as a waterproof seal. Also, the new Automatic Pressure Equalization

Valve releases built-up air pressure while keeping water molecules out, resulting in a watertight case that is even easier to open.

NEW FEATURES AND COLORS

WHEELS

Stainless steel ball bearing wheels (on select cases) last longer and ride smoother. The nylon hub adjacent to the stainless steel is made to resist heat. Result: less wear and tear on the polyurethane wheel.

STAINLESS STEEL BALL BEARING WHEELS

NYLON HUB

POLYURETHANE TIRE

PANEL FRAME MOUNTING SYSTEM

Pelican offers an easy solution for installing interface panels to any Pelican Protector™ Case: Our mounting bracket installs beneath our panel and fits against stops molded inside the case walls. With pre-drilled holes and stainless steel screws, fabricating a custom case is faster, stronger, and more accurate.

Receive interior dimensions in any CAD format via email

CUSTOM LOGOS

Your logo can be applied in multiple colors as a decal or hot stamp, using strict PMS print controls on any Pelican™ Case. You'll approve a paper proof or first article prior to the run and, like everything we manufacture, our imprinting is 100% guaranteed.

EXTRA PROTECTION

Pick 'N' Pluck™ foam and versatile padded divider sets are available for cushion and extra protection. For a better fit, our engineers will map the layout of your equipment for custom foam inserts. Just send the actual equipment or a CAD drawing of the part and we'll die cut the foam insert and install it in a matching case. Call for minimum quantities and details.

REINFORCED PADLOCKS

Metal reinforced padlock protectors provide added strength and extra security against cutting and theft.
