

UFP's broad range of performance foams provides product protection against shock, vibration, ESD, abrasion, thermal and other types of damage during shipment. Single use or reusable packs are custom-designed with the most cost-effective foam or combination of materials to meet specific product fragility and shipping requirements. The spectrum of products packaged includes fragile electronics, sensitive instruments, medical implants, and missiles.

EXAMPLES AND APPLICATIONS:

- Extruded and crosslinked polyethylene foams
- Polyurethane foams
- Sterilizable foams for medical applications
- Antistatic and conductive foams
- Foams for Class A surface protection
- Living hinge and expandable grid end caps

FEATURES:

- Wide range of foam material choices
- Extensive conversion process capabilities
- In-house design and tooling
- Engineering flexibility and equipment choices

MARKETS SERVED:

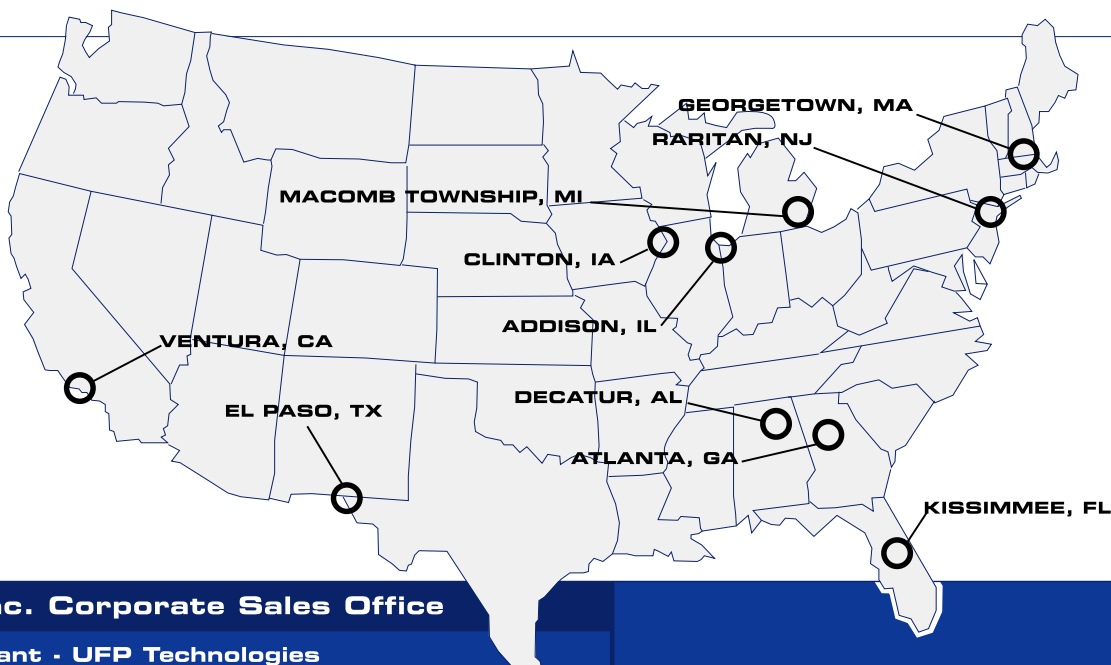

- Electronics
- Medical
- Military

BENEFITS:

- Ability to package products of varying sizes and fragility ratings
- Wide range of design choices
- Faster and more controlled development cycle
- Long and short run capabilities

TECHNOLOGIES

UFP Technologies is an innovative designer and custom converter of foam, plastics and natural fiber products. UFP provides solutions to its customers from its ten advanced engineering and manufacturing facilities in North America. The company's **ENGINEERED PACKAGING** division provides custom protective packaging for the medical, electronics, automotive, military and industrial markets. UFP's **COMPONENT PRODUCTS** division designs and manufactures engineered component solutions utilizing laminating, molding and fabrication technologies. This division provides the "product within the product" to the automotive, beauty, medical, industrial, and sports and leisure markets.
